

### Sujiko 1 - Warm Up!

Put two numbers between 1 to 9 in the spaces so that the four numbers add up to the number in the circle.

## Sujiko 2

Put any numbers between 1 to 9 in the spaces so that the four numbers making up each square add up to the number in the circle. Persevere with this: I imagine you will have a go, you will find out it doesn't work and then have to try again: trial and **improvement!**
