

Geography Progression Document

Geography Curriculum Statement

Intent

Geography at Brecknock inspires the children to see themselves as geographers. The curriculum enables them to fully understand the interaction between human and physical geographical processes. Children access a range of thematic and regional studies, placing their identity and locality at the heart of learning, establishing connections on a local to global scale. They are taught to apply their skills and knowledge to understand why the world is the way it is today, and what it will be like in the future. Knowledge and skills are taught in a way that enables the children to enquire, carry out fieldwork and develop expert map skills. Geography is present in every topic across the curriculum, providing a rich web of knowledge and skills to help connect learning.

Knowledgeable learners

- The geography curriculum has geographical skills and knowledge (place, locational and physical and human geography) at its core.
- It reflects the aims and content of the National Curriculum at each key stage. This begins in the Early Years with the 'Understanding the World' strand of the EYFS framework.
- Children acquire key knowledge, understanding and skills related to a range of geographical themes and regions.
- They are taught to recall and apply their knowledge in order to demonstrate their geographical enquiry and thinking, whilst making connections and comparisons between places, people, resources and natural and human environments as well as the Earth's key physical and human processes.
- Lessons will be contextualised to make them purposeful, ensuring that children understand the relevance of the curriculum and how it can explain and impact the world around them.
- Children will build upon their knowledge, understanding and skills as they progress through the school.

Confident communicators

- Children will develop the ability to carry out fieldwork and enquiry in order to communicate and express their findings or data.
- A range of oracy activities and techniques will be used to ensure that appropriate geographical vocabulary is learnt by all children.
- Lessons will support children to suggest and respond to geographical questions, using a dynamic range of vocabulary in order to explain, debate and justify. They will be able to use a range of primary and secondary geographical sources to help inform and draw conclusions.

Active citizens

- In developing the children's geographical understanding, this helps to develop their own identity and place in the world, empowering them through work on global issues, giving them the agency to act upon injustices and tackle the status-quo.
- Geography acts as the spark to ignite our children's fascination and love for the world, in order to sustain lifelong learning and the agency to make a difference.
- In EYFS the 'Understanding the world' learning guides children to make sense of their physical world, their community and the environment

Implementation

- The National Curriculum aims and key geographical skills and knowledge shape the discrete lesson taught within topics. Each year group has objectives embedded within the four key areas of geographical knowledge; place knowledge, locational knowledge, human and physical knowledge and geographical knowledge and fieldwork.
- Topics are carefully chosen on a thematic and regional basis in order to progressively deepen understanding, moving from the familiar and concrete to the unfamiliar and abstract.
- Teaching resources will avoid creating single images or reinforcing harmful stereotypes of countries or societies by being balanced and well thought out in order to create an accurate impression.
- Curriculum content is chosen to enable pupils to gain a sense of identity and ownership through what is being taught, placing their community at the heart of geography learning in order to connect with the wider world e.g. Jamaica study, Rivers study
- Geography aims to create a sense of agency and advocacy in children. By understanding the interaction between key physical and human processes children will start to appreciate the necessity to enact change, the SDGs act as a vehicle for them to navigate how and why change can occur.
- Fieldwork is a vital part of the geography curriculum. All year groups spend time carrying out fieldwork within the school grounds, the local area, London and in KS2 in other parts of the country and Europe. These experiences will give the children a sense of scale, improve a wide range of geographical skills and enquiry.
- All children including those who have SEND or are disadvantaged are supported to fully access the geography curriculum. This may include additional adult support or use of visuals or Widget symbols for instructions. Structured sentence stems and taught vocabulary scaffolds to aid children in discussion.

Geography Progression Document

Impact

We measure the impact of our geography curriculum in various ways.

- Pupils should be able to recall key facts and information, use subject specific vocabulary and use their geographical skills. We look at children's ability to talk confidently about their learning, recalling key facts and concepts. This may be through pupil voice conferences, or through teachers' formative assessment of pupil talk in class.
- Monitoring processes, such as book looks, track the progression of children using their geography skills and practising the recall of key knowledge.
- Planning audits are used to support teachers in delivering high quality lessons.
- Pre and post assessment tasks are planned for each geography unit.
- Low stakes quizzes are used, such as those used to recap previous learning at the start of lessons, or those used as part of home learning.
- Formative teacher assessment and marking takes place in each individual lesson and can be given verbally, this includes for fieldwork.

A detailed document showing progression of skills for each year group can be found below.

Content of the National Curriculum	<p>'guide children to make sense of their physical world and their community'</p> <p>Understanding the world involves guiding children to make sense of their physical world and their community. The frequency and range of children's personal experiences increases their knowledge and sense of the world around them – from visiting parks, libraries and museums to meeting important members of society such as police officers, nurses and firefighters. In addition, listening to a broad selection of stories, non-fiction, rhymes and poems will foster their understanding of our culturally, socially, technologically and ecologically diverse world.</p>	<p>Pupils should develop knowledge about the world, the United Kingdom and their locality. They should understand basic subject-specific vocabulary relating to human and physical geography and begin to use geographical skills, including first-hand observation, to enhance their locational awareness.</p>	<p>Pupils should extend their knowledge and understanding beyond the local area to include the United Kingdom and Europe, North and South America. This will include the location and characteristics of a range of the world's most significant human and physical features. They should develop their use of geographical knowledge, understanding and skills to enhance their locational and place knowledge.</p>

Geography Progression Document

						Organise results in a spreadsheet.		Design own census, pilot and evaluate it.
Map Skills	Follow directions (Up, down, left/right, forwards/backward)	Follow directions (Up, down, left/right, forwards/backwards) Draw picture maps of imaginary places and from stories.	Follow directions (Up, down, left/right, forwards/backwards) Draw picture maps of imaginary places and from stories. Use own symbols on imaginary map. Use a simple picture map to move around the school; Recognise that it is about a place. Use relative vocabulary (e.g. bigger/smaller, like/dislike) Draw around objects to make a plan. Learn names of some places within/around the UK. E.g. Home town, cities, countries e.g. Wales, France. Use picture maps and globes	Follow directions (as yr 1 and inc'. NSEW) Draw a map of a real or imaginary place. (e.g. add detail to a sketch map from aerial photograph) Begin to understand the need for a key. Use class agreed symbols to make a simple key. Follow a route on a map. Use a plan view. Use an infant atlas to locate places. Begin to spatially match places (e.g. recognise UK on a small scale and larger scale map) Look down on objects to make a plan view map. Locate and name on UK map major features e.g. London, River Thames, home location, seas. Find land/sea on the globe.	Use 4 compass points to follow/give directions: Use letter/no. coordinates to locate features on a map. Try to make a map of a short route experienced, with features in correct order; Try to make a simple scale drawing. Know why a key is needed. Use standard symbols. Locate places on larger scale maps e.g. map of Europe. Follow a route on a map with some accuracy. (e.g. whilst orienteering) Begin to match boundaries (E.g. find the same boundary of a country on different scale maps.) Begin to draw a sketch map from a high viewpoint. Begin to identify points on maps A,B and C within the N.C document. (see www.nc.uk.net/nc/cont	Use 4 compass points well: Begin to use 8 compass points; Use letter/no. coordinates to locate features on a map confidently. Make a map of a short route experienced, with features in correct order; Make a simple scale drawing. Know why a key is needed. Begin to recognise symbols on an OS map. Locate places on large scale maps, (e.g. Find UK or India on globe) Follow a route on a large scale map. Begin to match boundaries (E.g. find the same boundary of a county on different scale maps.) Draw a sketch map from a high view point.	Use 8 compass points; Begin to use 4 figure coordinates to locate features on a map. Begin to draw a variety of thematic maps based on their own data. Draw a sketch map using symbols and a key; Use/recognise OS map symbols Compare maps with aerial photographs. Select a map for a specific purpose. (E.g. Pick atlas to find Taiwan, OS map to find local village.) Begin to use atlases to find out about other features of places. (e.g. find wettest part of the world) Measure straight line distance on a plan. Find/recognise places on maps of different scales. (E.g. river Nile.) Draw a plan view map with some accuracy. Identify significant places and environments as stated within KS2 N.C. (see www.nc.uk.net/nc/contents/geog.htm for maps)	Use 8 compass points confidently and accurately; Use 4 figure coordinates confidently to locate features on a map. Begin to use 6 figure grid refs; use latitude and longitude on atlas maps. Draw a variety of thematic maps based on their own data. Begin to draw plans of increasing complexity. Use/recognise OS map symbols; Use atlas symbols. Follow a short route on an OS map. Describe features shown on OS map. Locate places on a world map. Use atlases to find out about other features of places. (e.g. mountain regions, weather patterns) Use a scale to measure distances.
