Geography Learning Journey

Nursery	Reception	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Likes and dislikes in the environment Care for the natural environment	Similarities and differences between countries Map skills	Explorers Migration	United Kingdom Islands Foundlings	Prehistoric Britain Going Underground	Roman Britain Epping Forest study America study	Burwell House — The Fens study Rivers	NW5 – My London France

Geography Vocabulary

compass		A tool for finding direction which always points north.
infrastructure		The systems, structures and facilities to support the area.
observations		The action of carefully watching someone or something.
digital mapping		The collection of data to create a display of the geography of the region.
topography		Describes the physical features of an area of land.
settlement		A place where people set up a community.
tourism		When people travel somewhere away from their home for pleasure.
flora		The plants of a particular habitat.
fauna		The animals of a particular habitat.
analyse		To carefully examine information and data to be able to explain it.
data		Information—facts, observations, numbers, graphs or measurements
trends		A general change to help you study a pattern over time.
heath		An area of open land that does not grow crops.

Key Facts

Human geographical features are infrastructure like houses, roads and bridges. They have been built by people—they are manmade.

Physical geography features like seas, mountains and rivers are natural. They would be here if there were no humans.

Hampstead Heath is an ancient heath in London, spanning 320 hectares (790 acres).

Around 7 million people visit the Heath every year.

The Heath has many uses and includes a lido, swimming ponds, tennis courts, a sports track and playgrounds.

Kenwood House sits on the edge of Hampstead Heath, with an art gallery, café and children's activity area.

The south-east part of the heath is called Parliament Hill, from which the view over London is protected by law.

The Heath has lots of different habitats for wildlife, like acid grassland, heathland, woodland, hedgerows, wildflower meadows, streams and more than 30 lakes and ponds.
